

Hello,

Thank you for representing the taxpayers of CT as an elected official.

Your role is to abide by and adhere to rules and laws that protect the citizens of the state. Your job is NOT to overburden the citizens with legislation that undermines the legitimacy of our elections and that is exactly what the proposed legislation will do in Connecticut.

The choices that are being made in Hartford are significantly adversely affecting the citizens. Eventually, we will all leave and then there will be no tax money. But perhaps that is why way too many of our elected officials went against the cry of the people and supported the illegitimate extension of fake emergency status to suck funds from the Federal government.

Do you know that you are destroying the livelihoods, educational system and overall morale of the state with everything that has happened, especially over the past two years? I wonder if there are any Godly people left in the Democratic Party who actually feel convicted to do something positive for our state? If you have had even the slightest encounter with God in your life, you will know in your heart that unlimited ballots sent out throughout the state is wrong.

Even communist countries, perhaps the most satanic of rulers in all the world, do not bombard the land with hundreds of thousands or millions of ballots.

This past election, my father was out of the country but wanted to vote in our local election. We sought out a mail in ballot and followed the laws so he could vote. That is what people do if they cannot be at the polls on election day. It works and we would have done the same if he were sick or frail or could not go to the polls on election day.

It is time to stop voting "party line" and show us that you actually represent the people in your neighborhood who KNOW that the cost and burden of these proposed bills will effectively destroy whatever representation the citizens may have in the State of Connecticut.

Vote no on SB 184 and HB 5262.

Thank you,

Mona Colwell
